

MARK JEFF ABASULA

markjeff.abasula@outlook.com | 0961-516-8268 | Manila, Philippines | [linkedin.com/in/markjeffabasula](https://www.linkedin.com/in/markjeffabasula)

Senior Full Stack Engineer & Technical Lead with 16+ years of experience architecting scalable web, mobile, and cloud solutions. Proven track record managing multi-system integrations, stakeholder deliverables, and Agile development teams across Retail, E-Commerce, and enterprise B2B sectors. Combines deep technical expertise in modern stacks (Vue.js, React, Laravel, Python) with hands-on leadership in project scoping, cloud infrastructure (Alibaba, Azure), and technical documentation.

WORK EXPERIENCE

UNI-PIPC

Supervisor Software Engineer

January 2026 – Present

- **7-Eleven Project - Backoffice / Middleware / Point-of-Sale (POS)**
 - Directed project delivery and task backlogs in Azure Boards, facilitating cross-functional alignment and weekly/monthly status reviews across clients, engineering teams, and external vendors to mitigate project risks.
 - Designed system architecture and data flow diagrams to integrate 3 distinct core systems, establishing seamless cross-platform data mapping and modular process flows.
 - Authored comprehensive technical documentation, including Cloud Infrastructure architecture, Technical Design Documents (TDD), Data Mapping blueprints, and Dashboard UI specs.
 - Led internal developer team sprint execution, translating complex scope requirements into clear tasks, leading peer code reviews, and maintaining high code quality standards.
 - Spearheaded hands-on module development, authoring unit testing suites to ensure component reliability while provisioning and managing pre-testing cloud server environments.

Senior Software Engineer (FullStack)

June 2025 – Present

- **Residential Project**
 - Engineered a mobile application from scratch using Vue.js, Vuetify, and Pinia for reactive state management.
 - Translated high-fidelity Figma design wireframes into pixel-perfect, responsive UI components, ensuring consistent cross-device performance.
 - Integrated RESTful backend APIs with frontend client systems, establishing reliable data binding, state management, and real-time updates.
 - Led weekly client sprint reviews, presenting feature demonstrations, gathering technical requirements, and aligning backlog priorities with business goals.
 - Executed end-to-end unit testing and debugging, identifying application bottlenecks to maintain high platform stability and code quality.
 - Engineered and integrated an AI-powered chatbot into the mobile application, delivering real-time conversational messaging and automated customer support features.
- **iOpenMall Project**
 - Delivered end-to-end full stack enhancements and core feature developments, modernizing application functionality across frontend and backend layers.
 - Streamlined bug resolution workflows through targeted testing and debugging, resolving critical technical issues prior to production deployments.
 - Interfaced directly with external stakeholders via weekly client syncs, capturing core specifications, refining requirements, and demonstrating completed deliverables.

Accenture Philippines

- **ServiceNow Developer** (Bootcamp)
 - Attend ServiceNow Bootcamp Training

August 2024 – November 2024

Lenovo PCCW Solutions Philippines

- **Solutions Developer**
 - Architected and maintained core internal applications, enhancing system reliability and ensuring seamless daily operations across enterprise tools.
 - Collaborated cross-regionally with Local and Hong Kong marketing teams to align web infrastructure, execute digital campaigns, and support regional growth initiatives.
 - Implemented Google Analytics 4 (GA4) and technical SEO enhancements, optimizing site structure, improving organic search visibility, and driving data-informed decisions.
 - Spearheaded the full-cycle rebuild of the corporate website, architectural redesign, and end-to-end development of a custom CMS from scratch, modernizing the company's digital footprint.

April 2017 – April 2024

US Autoparts Network Inc.**• Server-Side Developer****October 2014 – June 2016**

- Engineered features for legacy and new e-commerce applications, leveraging a custom internal framework to improve online shopping workflows and backend reliability.
- Collaborated within an Agile development environment, actively participating in daily stand-ups and sprint discussions to ensure alignment on project deliverables and timelines.
- Managed codebases using Git version control, maintaining clean repository branches and facilitating smooth peer collaboration across deployment cycles.
- Executed comprehensive testing and debugging, proactively identifying code defects and optimizing application stability prior to release.

EstanSAAS Software Development Inc.**• Web and Mobile (iOS) Developer****October 2012 – October 2014**

- Architected and engineered responsive web applications and native iOS apps tailored to client specifications, prioritizing UI/UX design, intuitive navigation, and cross-platform performance.
- Executed comprehensive testing, debugging, and quality assurance across new and legacy codebases, eliminating performance bottlenecks and ensuring system reliability.
- Managed application codebases using Git version control, maintaining clean repository branching strategies to facilitate continuous integration and seamless team collaboration.
- Engaged actively in daily Agile/Scrum stand-ups, coordinating with cross-functional teams to resolve technical blockers, align sprint goals, and ensure on-time project delivery.

Valueline Systems and Solutions Corp.**• Junior Web Developer****July 2011 – October 2012**

- Engineered core modules for commercial web applications, including HRIS, CRM, and POS & Inventory Management systems, directly contributing to the company's suite of enterprise SaaS products.
- Translated business and user requirements into functional web features, prioritizing intuitive UI/UX design, modular architecture, and optimal system performance.
- Perform testing and debugging across legacy and newly developed product features, resolving software defects to ensure high reliability prior to client deployments.
- Refactored and optimized web application codebases, improving data handling efficiency across high-volume inventory, customer management, and payroll workflows.

EDUCATION**Bachelor of Science in Computer Science****2007 – 2011**

STI College Fairview

SKILLS

- **Languages & Frameworks:** PHP, JavaScript, TypeScript, Python, Laravel, CodeIgniter, FastAPI, Vue.js, React.js, Vuetify, Tailwind CSS, Pinia
- **Data & Infrastructure:** MySQL, PostgreSQL, MongoDB, Alibaba Cloud, Docker, Git, RESTful APIs, Redis
- **Management & Practices:** Agile/Scrum, Azure DevOps, Project Scope & Timeline Management, TDD, SDLC, Microservices
